PROFESSIONAL SUMMARY

Full-stack developer with 2+ years shipping and operating production systems end-to-end — from schema design through deployment infrastructure. Built ~80% of MyPrescription as a freelance developer, a live healthcare SaaS, directing two intern contributors on backend development. Comfortable across Next.js/React, Express.js/Bun/NestJS, PostgreSQL/Redis, and Docker/GitHub Actions/nginx on self-managed VPS. Also builds a 10K+-follower developer-education audience on Instagram (@abdelalidev), creating technical content in Darija for North African developers.

SKILLS

Languages: JavaScript, TypeScript

Frontend: Next.js, React.js, React Native, Tailwind CSS

Backend: Node.js, Express.js, Bun, NestJS

Databases: PostgreSQL, Redis, Firebase

Infrastructure: Docker, CI/CD (GitHub Actions), nginx, Linux VPS deployment

Tools: Git/GitHub, Swagger, Sentry, Postman, Agentic AI Development

EXPERIENCE

Full-Stack Developer — [MyPrescription \(Healthcare SaaS\)](#)

Sep 2025 – Jun 2026 / Algeria

- Built ~80% of a live healthcare SaaS end-to-end as a freelance developer, directing two intern contributors on backend development and shipping features used daily by *dozens of doctors and administrative staff across multiple clinics*.
- Architected RESTful backend APIs (Express.js on Bun) and PostgreSQL schemas powering biological exam forms, certificate generation, and periodontal charting workflows for clinical use.
- Designed authentication and role-based access control (RBAC) across account types (doctors, administrative assistants) using *JWT-based sessions*; owned deployment infrastructure (Docker, GitHub Actions CI/CD, nginx-fronted VPS) supporting continuous production releases.
- Optimized database queries and managed schema migrations, reducing average query response times by an estimated *30–40%* as clinical usage scaled.
- Built responsive clinician and admin dashboards (Next.js, Tailwind CSS) enabling *real-time exam-record lookup and same-day certificate issuance* for daily clinical operations.
- Extended the platform beyond the browser: shipped a React Native WebView mobile app (redesigned for full responsiveness, with device-specific access restrictions) and a desktop app (*Electron*) with a custom online/offline sync engine.

Full-Stack Developer — Mimstore

Jan 2024 – Jul 2025 / Algeria

- Led development of internal dashboards (React/Next.js) with backend API integration, supporting *cross-departmental internal operations and data visualization*.
- Refactored component architecture for reuse across dashboard features, *consolidating repeated UI patterns into a shared component library*.

Frontend Developer Intern — Sonelgaz

Dec 2023 – Feb 2024 / Algeria

- Built responsive, semantic web interfaces in partnership with UI/UX designers, translating design specs into production-ready components.

PROJECTS

Showroom213 — [SaaS for Car Dealerships \(Founder\)](#)

Mar 2026 – Present

- Founded and built a SaaS platform enabling car dealerships to *manage vehicle inventory and showcase listings online*, architected with *Next.js, Bun, TypeScript, PostgreSQL, Redis, Docker* and deployed to production.

Nutio — Social Food & Nutrition App — Graduation Thesis Project

Jan 2026 – Jun 2026

- Architected a cross-platform mobile app (React Native, NestJS backend, Firebase) covering *meal logging, nutrition tracking, and social recipe sharing*, including *a real-time social feed and Firebase-based nutrition recommendations* — delivered as a full-stack graduation thesis.

Print Management System — Academic Project

Apr 2025 – Jun 2025

- Built a multi-tenant request-approval system with one-click approve/reject workflows and usage analytics (totals, rejections, per-teacher/departement breakdowns), built with *Next.js and Node.js/Express*.

EDUCATION

Licence Professionnelle (Professional Bachelor's Degree)

Sep 2023 – Jun 2026

Applied Web Development

University of Boumerdes, Faculty of Sciences — Algeria

CERTIFICATIONS & LANGUAGES

Frontend Development Libraries — freeCodeCamp (Apr 2025)

Backend Development and APIs — freeCodeCamp (Dec 2024)

Languages: Arabic (Native), English (B1 – Intermediate)
